**MEMORANDUM FOR:** Director, Intelligence Community Staff

**FROM:** John H. Stein  
Deputy Director for Operations

**SUBJECT:** Proposed Survey of Intelligence Community  
Computer Systems Pertaining to Disseminated  
Intelligence Products

1. Recent discussions with members of my staff regarding the proposed Community Information Retrieval System (CIRS) have raised questions regarding the manner and extent to which member agencies of the Intelligence Community may be including Directorate of Operations intelligence reports in their computerized information retrieval systems. I would like to ensure that these systems provide adequate safeguards for the protection of sources and methods in accordance with DCID 1/7.

2. I, therefore, strongly recommend that a survey of Intelligence Community computer systems be undertaken to determine what intelligence-product indices and data bases currently exist, where they are located, who has access to them, how they are controlled, and how they safeguard the variously classified and restricted information they contain.

3. I suggest that appropriate members of the D0 pursue this matter with your staff.

John H. Stein
